REQUEST FOR PROPOSAL

Digital Workplace & Solutions
Managed Services Support

Issued Date: April 22, 2025

By reviewing this Request for Proposal, you agree as follows: (a) to treat this RFP, its contents, and any discussions you have with Rivian concerning this RFP and the work it contemplates as confidential and not to disclose the foregoing to your employees, contractors, agents or any other person or entity except to the extent reasonably necessary for you to determine whether you will submit a roposal in response to this RFP and to formulate any such roposal; and (b) should you elect not to submit a roposal in response to this RFP or to withdraw your roposal once submitted, you will notify Rivian of the same in writing. If you are unable to agree to the foregoing, please do not review or copy the RFP and please destroy the digital documentation.

PLEASE READ THE PARAGRAPHS BELOW BEFORE PROCEEDING

This Request for Proposal ("RFP") is an invitation by Rivian Automotive, LLC ("Rivian") to bid on the opportunity to provide managed services IT support for our Digital Workplace & Solutions team. Any quote, bid or other response to this RFP submitted by you shall hereinafter be referred to as your "Proposal."

The issuance of this RFP and the receipt of information in response to this RFP shall not in any way cause Rivian to incur any liability or obligation, financial or otherwise, except as specifically set forth in this RFP. Rivian assumes no obligation to reimburse or in any way compensate you for expenses incurred in connection with your response to this RFP or any Proposal that you may elect to submit.

Rivian may reject a Proposal for any reason and will not be required to provide reasons or justification with respect to its decision reject a Proposal. In certain situations, where applicable, Rivian may elect to provide feedback to supplier responding to an RFP ("Supplier") as to why its Proposal was not selected for further consideration, although it is not required to do so. Further, Rivian may choose not to consider any Proposals from any Suppliers.

Rivian may award business or services covered by this RFP to multiple Suppliers or to a single Supplier, in its sole discretion.

Any Supplier is hereby requested to maintain price protection for its Proposal for a minimum of one hundred and twenty (120) days following its submission, and to notify Rivian of the price protection timeframe if not 120 days. However, to the extent that Rivian materially changes any of its requirements as reflected in this RFP or in the written communications exchanged with a prospective Supplier, Rivian will negotiate in good faith with such prospective Supplier concerning any resulting changes in the Proposal that the Suppler considers reasonably necessary. Any updates to a Proposal in response to such changes must be made in writing.

An incumbent Supplier is permitted to discuss current business only with normal and appropriate Rivian contacts. These individuals will address all payment, invoicing, operational, and other issues that may arise throughout this RFP process. For the purposes of this section, the RFP process is defined as the time from issuance of this RFP to the selection of one or more prospective Suppliers. Any incumbent Supplier that attempts to contact Rivian personnel during this period, other than to discuss current business will be in violation of this restriction and risks having its Proposal disqualified.

Rivian will not provide any warnings to a Supplier prior to disqualifying its Proposal, and will contact the Supplier in writing, referring to this section of the RFP and the instance of the violation. No action related to this RFP obligates Rivian to perform any act or incur any costs, expenses, or liabilities. Rivian assumes no obligation to reimburse or otherwise compensate a Supplier or any third party or recipient of this RFP for losses or expenses incurred in connection with this RFP. Rivian shall have the right to use, for any purpose, any information received by the Supplier in connection with this RFP.

Rivian reserves the right, at its discretion, to pursue any or all the following actions regarding this RFP:

- Reject a Proposal or award the contract without inviting the Supplier or any third party to submit a new Proposal
- Waive deviations or any requirement of the RFP
- Issue subsequent RFPs
- Withdraw this RFP or extend the time for submission of Proposals
- Appoint independent members to serve in the oversight capacity of the RFP process
- Remedy technical errors in this RFP
- Approve or disapprove the use of contractors and subcontractors
- Request additional information and/or clarification
- Modify any requirements contained within the RFP and request revised submittals from Suppliers
- Negotiate with any, all, or none of the Suppliers
- Modify or cancel the project
- Accept any written Proposal as an offer, without negotiation, and issue a notice to proceed
- Restrict the review or distribution of all Proposals until a contract is awarded
- Award a contract for services that is different from those services specified in the RFP
- Take whatever other action Rivian deems in its best interest

B. RFP TIMELINE

Step	Instructions	Due Date
1	**Release of RFP to Selected Suppliers** The RFP will be sent out to the selected suppliers.	April 22, 2025
2	**Submit Intent to Respond via Email** After reviewing the entire RFP document and attachments, please respond via email with your intent to respond.	April 28, 2025
3	**Submit Clarifying Questions via Email Using Template** After thoroughly reviewing the RFP and attachments, if the need arises to request clarification or ask Rivian questions related to this RFP, please submit questions via email using the Excel template provided. Rivian will collect questions and distribute all questions and answers to respective parties. Originators of the questions will remain anonymous.	April 30, 2025
4	**Rivian Response to Suppliers via Email** Consolidated responses to all submitted questions will be distributed. Originators of the questions will remain anonymous.	May 7, 2025
5	**Submit Final RFP Response via Email** All Proposal material and pricing must be submitted to Rivian via Email by the specified due date.	May 14, 2025
6	**Rivian Evaluation Process and Supplier Notification** Rivian will undergo a thorough evaluation period of all supplier Proposals and notify suppliers of results.	As Needed

NOTE: Due Dates above are subject to change by Rivian.

Failure to comply with the above timeline may result in rejection of the response. Any Proposals received after the applicable due date or that otherwise deviates from the project timeline set forth above will only be accepted at Rivian's discretion. The due date for any Proposal may be extended if, in Rivian's sole discretion, such action is necessary to satisfy the requirements of the RFP process or is deemed to be in its best interest. All time and expenses for development of the Proposal and participation in the RFP process, including document preparation, communications, demonstrations, or possible site visits are entirely the responsibility of the Supplier and will not be borne by Rivian nor shall the rejection of any or all Proposal submissions or the termination of this RFP process at any time shall not render Rivian liable for any reason. Please note that any Proposal which is incomplete or otherwise omits necessary information may be excluded from consideration. Suppliers may be asked to provide additional details about respective capabilities, any other specific details referenced in the Proposal or this RFP, and best and final pricing.

C. INTRODUCTION

Rivian Background

Rivian is an American electric vehicle ("EV") maker and automotive technology company. The company develops and produces vehicles, products and services related to sustainable transportation. The company has facilities in Michigan, California, and several countries in Europe. Rivian's manufacturing plant is in Normal, Illinois. Rivian has announced it's new R2, R3 and R3X vehicles with start of production in 2nd half 2026.

Rivian is launching a range of adventure-oriented vehicles, alongside delivery vans designed specifically for Amazon last-mile delivery applications. Rivian's consumer vehicles, the R1T and R1S, deliver a unique combination of performance, off-road capability, and utility. These vehicles use the company's flexible "skateboard" platform and are produced at Rivian's manufacturing plant in Normal, Illinois. Customer deliveries began in September 2021. The Rivian R1T received Motortrend's truck of the year in 2022. The Rivian R1T and R1S in 2023 earned a TOP SAFETY PICK+ award from the Insurance Institute for Highway Safety (IIHS).

We design, develop, and manufacture category defining EVs and accessories. We sell them directly to customers in the consumer and commercial markets. Our vehicles are complemented by a full suite of proprietary, value-added services that address the entire vehicle lifecycle and deepen our customer relationships. Starting with a clean sheet, we built a vertically integrated ecosystem comprised of our vehicle technology platform, Rivian Cloud, product development and operations, products, and services. Interconnected by our data and analytics backbone, our ecosystem is designed to deliver fast-paced innovation cycles, structural cost advantages, and exceptional customer experiences, all of which combine to create a self-reinforcing growth dynamic while serving our mission to Keep The World Adventurous Forever.

Complementing our consumer vehicles, our suite of value-added services includes digitally enabled financing, telematics-based insurance, proactive vehicle service (maintenance and repair) and software services, comprehensive charging solutions, and a data-driven vehicle resale program. We expect these services to generate long-term brand loyalty while also creating a recurring revenue stream for each vehicle across its lifecycle.

We are at the tipping point of EV adoption as the trillions of miles traveled each year across the planet transition to EVs. Excitement and interest toward EVs continue to grow as consumers and commercial customers increasingly understand EVs offer a compelling experience, performance, operating cost, and environmental benefits. Rivian exists to help drive this transition by building category-defining EVs that combine performance, efficiency, and technology, as well as a full suite of proprietary, value-added services that address the entire vehicle lifecycle. We crossed several major milestones, including:

- On the consumer side, we launched the R1 platform with our first generation of consumer vehicles, the R1T, a two-row, five-passenger pickup truck, and the R1S, a three-row, seven-passenger sport utility vehicle. In the commercial market, we

launched the Rivian Commercial Van platform. Our first vehicle on this platform is the Electric Delivery Van, designed and engineered by Rivian in collaboration with Amazon, our first commercial customer.

- Seeing the excitement and enthusiasm for the products we are building, including the R1T being selected as MotorTrend's 2022 Truck of the Year: https://www.motortrendgroup.com/motortrend-names-rivian-r1t-2022-truck-of-the-year/), as well as other accolades.
- Launching a digital-first, direct-to-consumer experience platform that allows us to manage the customer experience from the first time they view the vehicle online through sale, delivery, service and more.
- Introducing our FleetOS digital fleet management solution for commercial customers.
- Making the natural world a stakeholder in our success by establishing and funding Forever by Rivian, Inc., an organization focused on addressing climate change and preserving the biodiversity needed for our planet's long-term survival, with 8 million shares of Rivian common stock.
- Raising $13.7 billion of gross proceeds with our initial public offering.
- Selecting the site for our second U.S. manufacturing plant just outside Atlanta, Georgia.
- Announcing the launch of our next generation/line of vehicles – R2 and R3.

Our story is about people coming together with one mission in mind: to protect our planet and the cultures that inhabit it for generations to come. Looking ahead, we are focused on continuing to help drive the transformation of transportation. We believe our multi-program product development capability will enable us to expand our portfolio and addressable market with exceptionally designed and capable electric vehicles and an end-to-end, value-added software and service offering.

Rivian's Current State Digital Workplace & Solutions:

Rivian's current state includes an incumbent third party supplier providing this support. The environment of tools includes platforms like Atlassian, Google, Slack, and ServiceNow, as well as tools enhancing employee experience and productivity, content and collaboration solutions, and employee messaging services. Additionally, contracts cover essential support functions in project management, technical analysis, quality assurance, administration, development, and data engineering.

Project Objective and Approach

Rivian is committed to attracting and competing for suppliers from across the world that provide the highest quality and innovative products and services, when needed, with competitive pricing and advantageous terms.

The proposed solution is targeted to seamlessly continue our current external support with minimal impact on business operations. It will extend existing workflows to effectively manage new projects, tasks, and incidents.

Rivian intends to do business only with suppliers that subscribe to our philosophy of quality and competitiveness and who will collaborate with us to help ensure advantages in our marketplaces. Rivian recognizes that a supply base that can meet the requirements stated above enables our growth, and in return we will reward that supply base with the opportunity to grow with us.

Culture and people are a key factor in what makes every business successful. We're committed to building an inclusive workplace where ideas and innovation flourish and where all individuals feel a true sense of belonging. Through a shared, adventurous spirit where we're energized about our mission and our Compass Values (Come Together, Ask Why, Stay Open, Zoom Out and Over Deliver), we're able to stay aligned on our mission to Keep the World Adventurous Forever. The ideal Supplier will have a collaborative approach and diverse workforce that aligns with Rivian's culture.

Rivian will clearly articulate its requirements to all suppliers, ensuring that the playing field is level. As a result, we expect to receive the highest value for every dollar spent.

This RFP and the subsequent evaluation process are designed to help achieve the objectives listed above. This document is intended to provide sufficient background information about Rivian, our contractual procedures, and our sourcing requirements to allow you to prepare and submit a Proposal. All Supplier Proposals will be evaluated, and Rivian reserves the right to conduct Proposal-certification discussions.

D. RFP PROCESS

1. RFP Objective

The purpose of this RFP is to assess the capabilities of suppliers that have the potential to provide IT managed services support to our Digital Workplace & Solutions team.

Your response and Proposal will be developed at no cost to Rivian. Rivian's decisions regarding its selection of any company to supply support services will be final and confidential. Award decisions will be based on the availability to provide a Proposal at competitive rates, the ability to meet Rivian's functional and technical requirements, and timing.

This RFP is not a contract or an offer to enter into a contract. Submission of a Proposal in response to this RFP, and any subsequent discussion relating to such Proposal by Rivian does not constitute a contract or agreement to procure or perform service. No contract will be formed unless or until the parties execute a formal agreement (which will be delivered following successful evaluation of a Proposal) or until Rivian issues a Purchase Order, which shall be

subject to the applicable set of Rivian's General Terms and Conditions of Purchase, available at https://rivian.com/legal/supplier.

By submitting the information requested in this RFP, you indicate your understanding and agreement to the following:

- This is not an order or Rivian commitment of any kind.
- Any cost incurred to prepare your Proposal is done so at your own expense.
- The decision of whether to do business with you and to enter into an agreement with you is entirely Rivian's based upon whatever criteria Rivian may, at its sole discretion, choose to apply. Therefore, this RFP shall not be construed to be a commitment or obligation to you, expressed or implied, that any future business with Rivian will result. Rivian may reject at any time and for any reason your Proposal.
- Our practice is to inform Suppliers if we decide not to consider their Proposal.
- Your Proposal in response to this RFP should include sufficient data to answer Rivian's request. Legibility, clarity, coherence and conciseness are important for your consideration to assist Rivian in evaluating your Proposal. Throughout your response you are encouraged to detail your company's areas of strengths, including experience, resource commitment and financial viability, so we may evaluate your company appropriately and channel our future requirements based on supplier strengths.
- All Proposals submitted must be signed by an authorized executive who can function as an authorized contact with respect to the Proposal and this RFP.
- All Information exchanged in connection with this RFP or any Proposal shall be considered confidential and shall remain the exclusive property of the disclosing party. Nothing in this Agreement, or any course of conduct between the parties, shall be deemed to grant the recipient any license, right, title, or interest in or to such confidential information under this RFP except the limited right to review such confidential information to evaluate the RFP and, if applicable, prepare a Proposal.

2. Evaluation of Proposal

Your Proposal will be evaluated based on pricing and non-pricing factors and no single factor is outcome-determinative.

Evaluation Criteria: Proposals will be evaluated on the following criteria, listed in order of their relative priority with most important listed first. Each Supplier is required to complete the pricing document attached. Rivian's requirements are attached hereto as Exhibit A (Rivian Requirements).

2.1. The ability to meet Rivian's Requirements and deliver solutions and support across the following areas:
   a. Project Management
   b. Technical Business Analysis
   c. Quality Assurance
   d. Administration Solutions
   e. Development Solutions
   f. Data Engineering

2.2. Financial
   a. Total cost of ownership (discounts extended)
   b. Contract Term: Option for 1Y, 2Y or 3Y deal

2.3. Demonstrated expertise/capability to provide quality services.
   a. Technological expertise in Digital Workplace & Solutions suite of applications
   b. Previous experience with similar Customers of Rivian and interpersonal communication skills to support Rivian's employee organization
   c. Resolution of issues, projects, incidents, and requests

2.4. Supplier health and outlook
   a. Years in operation/business/technology roadmap
   b. Financial stability of company

3. **Pricing:** The Supplier should review the questions released and complete all sections.
   - Pricing must be submitted in the pricing document as part of this RFP package. All other submitted pricing documents may be discarded.
   - Taxes – Itemize all federal, state and local taxes that Rivian is ultimately responsible for. If such taxes are not indicated in the Supplier's response, it is assumed that the Supplier's prices/rates do not include any such taxes.
   - Surcharges – Itemize all regulatory and non-regulatory surcharges, pass-through surcharges and other fees that may apply, only if applicable.
   - Discounts – Identify all discounts, including tiered volume discounts, strategic investments, etc.

   3.1. **Non-Pricing Submittal:** The Supplier should review all sections of the RFP.
      - Failure to complete all sections will reflect negatively in the rating process.
      - Additional documents to support clarification may be attached to the response.
      - Both Pricing and Non-Pricing Submittal Documents must be received at the same time.

4. **Rivian Representation:** All contact and questions with regards to this RFP must be made via email. Discussion with other parties within or associated with Rivian may result in disqualification from this process.

For the purposes of this RFP, the Rivian representative is:
Name: Jake Beham
Title: Manager, Professional Services
Email: jbeham@rivian.com

5. After review by the evaluation team, all Suppliers who submitted Proposals will be eventually notified by email of Rivian's award / non award decision. Awarded Supplier(s) will be contacted to finalize the applicable agreement(s), all of which shall be subject to the applicable set of Rivian's General Terms and Conditions of Purchase available at https://rivian.com/legal/supplier-terms-conditions. Rivian may select another Supplier if negotiations with an incumbent Supplier fail or are unlikely to result in a mutually agreeable contract within thirty (30) days from the start of contract negotiations.

BY SUBMITTING A PROPOSAL TO THIS RFP, SUPPLIER AGREES THAT THEY HAVE READ AND UNDERSTAND THE RFP TERMS AND RIVIAN'S REQUIREMENTS. BY SUBMITTING A PROPOSAL TO THIS RFP, SUPPLIER AGREES THAT ALL REQUIREMENTS WILL BE MET IF SUPPLIER IS AWARDED THE BUSINESS.

THANK YOU for your interest in Rivian and your efforts in providing a response to this RFP. Rivian is committed to reviewing and providing feedback in a timely manner as we identify the appropriate partner(s) for this project.

Exhibit A
RIVIAN REQUIREMENTS

Objective
Provide service and support for DWS functional areas and products, including:

- Employee Messaging & Services (Google Workspace)
- Employee Experience & Productivity (Productivity Suite Apps)
- Content, Communication & Collaboration (Slack and other collaboration tools)
- Digital Atlassian Solutions
- ServiceNow Solutions

Work Start Date: September 1, 2025
Work Completion Date: August 31, 2026/2027/2028
Contract Term: Option for 1Y, 2Y or 3Y deal
Location of Work to be Performed: Remote

Scope of Work and Description of Goods and/or Services to be Provided
Technologies in Scope: Google Workspace, Slack, Zoom, Role-specific applications, Atlassian Suite, Box Sign, LucidChart & LucidSpark, Robotic Process Automation (UiPath, PowerBi), Smartsheet, Business applications, Adobe Suite, Airtable, Vizzlo, Calendly, Figma & FigJam, Glean Enterprise Search, Grammarly, AI applications, and more.

This RFP covers the following activities:

- Issues & Project work
- Incidents/Support tickets
- Service Request

This RFP covers the following types of Applications / Solutions:

- Digital Solutions (Atlassian suite), Atlassian Administrative Solutions
- Employee Experience & Productivity (including PMO Apps, Whiteboarding Apps, Intranet, Enterprise Search, Adobe Suite, etc.)
- Content, Communication & Collaboration
- ServiceNow (Portal, EC Pro, Workflows, etc.)
- Employee Messaging & Services (EMS) - Google, Staffbase, Twilio, SendGrid, M365

Role	Responsibilities	Functional Area	Current State Staffing

Application Administration & Configuration	• Serve as the primary administrator for software applications, including user provisioning/de-provisioning, access control, security settings, and configuration of features and functionalities.
	• Maintain and update application settings, workflows, templates, and integrations based on evolving business needs and best practices.
	• Ensure data integrity and security within each application.
	• Technical Support & Troubleshooting:
	  ○ Provide expert-level technical support to employees for assigned applications, resolving issues promptly and effectively.
	  ○ Develop and maintain knowledge base articles, FAQs, and other support documentation for end-users.
	  ○ Escalate complex issues to vendor

	support or internal IT teams as necessary and track resolution. ● User Training & Onboarding: ○ Develop and deliver training materials and conduct training sessions (virtual and in-person) for JV employees on the effective use of assigned applications. ○ Create and maintain onboarding documentation and processes for new JV users. ○ Promote adoption and best practices for utilizing the application suite. ● Collaboration & Stakeholder Management: ○ Partner closely with leadership, functional teams, and end-users to understand their business requirements and identify opportunities to		

	leverage our application suite for improved engagement and productivity. ○ Act as a liaison between stakeholders and internal IT teams or external vendors. ○ Participate in regular meetings with partners to provide updates, gather feedback, and plan for future needs. ● Application Optimization & Improvement: ○ Monitor application usage and performance, identifying areas for optimization and improvement. ○ Stay informed about new features, updates, and best practices for assigned applications. ○ Proactively recommend and implement enhancements to improve user		

	experience, efficiency, and functionality. ○ Contribute to the evaluation and implementation of new digital workplace tools as needed. ○ Contribute to the administration and content management of our Intranet and other internal communication platforms, ensuring relevant information is accessible to JV employees. ○ Support the implementation of communication strategies and initiatives through these platforms. ● Documentation & Reporting: ○ Maintain comprehensive documentation of application configurations, processes, and support procedures.		

	○ Generate reports on application usage, adoption rates, and other relevant metrics to inform decision-making. ● Compliance & Governance: ○ Ensure compliance with company policies, security standards, and data privacy regulations related to assigned applications. ○ Participate in audits and provide necessary documentation as required.		
Project Management	● Facilitate full life-cycle of projects from initiation to completion on all IT Capabilities related to the buildout of new work or retail spaces. ● Apply IT project management methodology and appropriate project management framework for all projects.	**Employee Messaging & Services (EMS) (X1)** **Content, Communication & Collaboration (X1)** **ServiceNow Platform (X1)**	**3 headcount**

	• Develop requests for proposals (RFPs) to engage third party installers.
	• Successfully initiate, plan, execute and close all project deliverables as committed.
	• Responsible for managing the overall planning, execution, and delivery of projects including:
	  ○ Defining the project scope, roles, tasks, milestones, budgets, and measures of success.
	  ○ Developing project estimates and plans to manage the end-to-end project execution.
	  ○ Ensuring business requirements are captured accurately and completely.
	  ○ Creating and maintaining project documentation
	  ○ Facilitating day-to-day coordination		

	while adhering to standards and sponsor expectations. ○ Acting as the link between the assigned project resources and key stakeholders. ○ Ensuring project closure including completion of lessons learned and required documentation. ○ Prove disciplined project management methodology to define scope, develop project plan, and execute projects that adhere to guidelines and deliver within cost and schedule. ● Track project status and managing project issues and risks including: ○ Monitor projects on an ongoing basis, evaluating progress/quality, managing issue resolution. ○ Manage the process to assess gaps and develop		

	action plans to address these gaps. ○ Monitor financial delivery and issue management processes, and escalating issues. ○ Promote and monitor compliance activities with audit and information policies. ○ Develop robust project risk management plans to ensure timely delivery, testing and commissioning of all projects with no impact to business continuity. ○ Review action items from the design/construction meetings and follow through with the closure of the action items. ○ Follow through projects with each stakeholder and report to the leadership team.		

Technical Business Analysis	• Requirements Elicitation and Analysis: Work closely with business stakeholders across various departments to understand their search needs, pain points, and desired outcomes. Elicit, analyze, and document detailed business requirements. • Technical Translation: Translate business requirements into clear and concise technical specifications for the engineering team, including user stories, acceptance criteria, and data flow diagrams. Collaborate with engineers to ensure requirements are understood and implemented correctly. • Product Roadmap Contribution: Contribute to the product roadmap by identifying opportunities for improvement and innovation based on user feedback, market trends, and business goals. • User Acceptance Testing (UAT): Develop and execute UAT plans to validate that	**Employee Experience & Productivity (X1)** **Digital Solutions (Atlassian suite) (X1)**	**2 headcount**

	implemented features meet the defined business requirements and provide a positive user experience. • Change Management: Develop and execute change management plans to ensure smooth adoption of the AI search platform across the organization. This includes creating training materials, conducting user training sessions, and addressing user concerns. • Communication: Communicate effectively with both technical and non-technical audiences. Prepare and deliver presentations, reports, and other communication materials related to the platform's features, updates, and benefits. Maintain clear and consistent communication with stakeholders throughout the product development lifecycle. • Market Research: Stay up-to-date on industry trends, competitive		

	landscape, and emerging enterprise search and AI technologies. ● Data Analysis: Analyze platform usage data to identify areas for improvement and measure the effectiveness of new features. ● Stakeholder Engagement: Identify and engage key stakeholders across departments affected by technology implementations. ● Change Impact Assessment: Analyze the potential impact of new technologies on existing workflows, processes, and job roles. ● Communication and Training: Develop and deliver communication plans and training programs to prepare employees for technology adoption. ● Resistance Management: Address concerns and resistance to change, fostering a positive attitude towards new technologies. ● Adoption and User Engagement: Drive user		

	adoption of technology solutions through effective change management strategies and ongoing support. ● Business Analysis: ○ Needs Analysis: Understand business needs and challenges that can be addressed with technology solutions. ○ Requirements Gathering: Elicit and document detailed requirements for technology systems, collaborating with technical teams and business stakeholders. ○ Process Optimization: Analyze existing business processes and identify opportunities for improvement through technology. ● Data Analysis: Analyze data related to technology implementation,		

	including user feedback, performance metrics, and business outcomes. • Solution Evaluation: Assess the effectiveness of technology solutions in meeting business objectives and identify areas for improvement.		
Quality Assurance	• Develop and Execute Test Plans: Create comprehensive test plans, test cases, and test scripts based on functional and non-functional requirements for various digital workplace platforms and applications (e.g., collaboration tools, communication platforms, productivity suites, internal websites, mobile applications). • Perform Testing: Conduct various types of testing, including functional, regression, integration, usability, and performance testing, to identify defects, inconsistencies, and areas for improvement. • Identify and Document Defects: Accurately document and track defects using a bug tracking system,	**Employee Experience & Productivity (X1)** **Digital Solutions (Atlassian suite)**	**1 headcount**

	providing clear and concise descriptions, steps to reproduce, and supporting evidence. ● Verify and Validate Fixes: Re-test resolved defects to ensure they have been fixed correctly and do not introduce new issues. ● Collaborate with Stakeholders: Work closely with IT teams (developers, system administrators), end-users, and business analysts to understand requirements, provide feedback, and ensure quality standards are met throughout the development and implementation lifecycle. ● Contribute to Quality Standards: Assist in defining and maintaining quality assurance standards, processes, and best practices for the digital workplace. ● Monitor and Analyze Results: Analyze test results, identify trends, and provide reports on the overall quality of digital workplace solutions. ● Participate in Design		

	Reviews: Participate in requirements gathering and design review sessions to provide input on testability and potential quality issues early in the development process. ● Stay Updated on Technologies: Keep abreast of new digital workplace technologies, testing tools, and methodologies to continuously improve QA processes. ● Contribute to Automation Efforts: Identify opportunities for test automation and collaborate with automation engineers to develop and maintain automated test scripts (if applicable). ● Support User Acceptance Testing (UAT): Assist with the planning and execution of UAT with end-users, providing support and guidance as needed. ● Troubleshooting and Problem Solving: Investigate and troubleshoot issues reported by users, working with relevant teams to find solutions.		

Development Solutions	• Design and Development: ○ Design, develop, and implement custom applications, integrations, and automations within our digital workplace ecosystem (e.g., collaboration platforms, communication tools, intranet portals, productivity suites). ○ Write clean, efficient, and well-documented code using relevant programming languages and frameworks (e.g., JavaScript, Python, .NET, scripting languages). ○ Develop and maintain APIs and integrations between different digital workplace platforms and enterprise systems. ○ Create	**Digital Solutions (Atlassian suite) (X2)** **Content, Communication & Collaboration (X4)** **ServiceNow Platform (X4)**	**10 headcount**

	user-friendly interfaces and ensure a consistent and intuitive user experience across digital workplace tools. ● Platform Management and Support: ○ Assist in the configuration, customization, and administration of key digital workplace platforms (e.g., Microsoft 365, SharePoint, Teams, other collaboration tools). ○ Troubleshoot and resolve technical issues related to digital workplace applications and integrations. ○ Participate in system upgrades, patching, and maintenance activities. ● Collaboration and Innovation: ○ Collaborate with IT teams, business analysts,		

	and end-users to understand requirements and translate them into technical solutions. ○ Participate in the evaluation and implementation of new digital workplace technologies and tools. ○ Contribute to the development of best practices and standards for digital workplace development and deployment. ○ Identify opportunities for process improvement and automation within the digital workplace. ● Testing and Quality Assurance: ○ Develop and execute unit tests and integration tests to ensure the quality and reliability of developed solutions. ○ Participate in code reviews to		

	ensure adherence to coding standards and best practices. ○ Assist in user acceptance testing (UAT) and gather feedback for iterative improvements. ● Documentation: ○ Create and maintain technical documentation for developed applications, integrations, and configurations. ○ Develop user guides and training materials as needed. ● Security and Compliance: ○ Adhere to security policies and best practices in all development activities. ○ Work with security teams to ensure the security and compliance of digital workplace solutions.		

Governance and Operating Model

- Quarterly reviews with Supplier & Rivian leadership
- Monthly reviews with leads on key metrics/areas of improvement
- Weekly updates
- Daily huddles

KPIs and Reporting

Volume of Work; Supplier shall deliver the following volumes **per quarter** during the course of the SOW.

KPI/Metric	**Volume per Quarter**
Issues/Project Work	414
Incidents	332
Service Requests	1651

- Issues/Project Work - velocity, on-time delivery, defect escape rate, CSAT, team morale, and release frequency.
- Incidents - Response time, first level resolution rate, escalated rate, automation rate, resolution rate, reopened incident rate, and CSAT.
- Service Requests - Response time, resolution time, percentage self serve rate, and CSAT.
